

## SHELLER-GLOBE CORPORATION

December 13, 1983

Mr. Dave Whiting  
Regional Office 6  
117 N. 2nd Avenue  
P. O. Box 27  
Washington, Iowa 52353

Dear Mr. Whiting:

During our conversation of 12-13-83 you requested a detailed description of our progress. As of December 15, we will have established a fenced area for hazardous wastes, crushed and removed 2,300 empty drums, removed 300 drums of liquid hazardous wastes and 3 drums of PCB's.

In addition to the above, we have appropriated \$75,000 for the clean-up and have established procedures to prevent this type of accumulation from occurring again.

We will not meet our December 15th deadline partially due to the fact that originally we were under the impression we could ship our solid wastes by bulk transport. Recently I have been informed we must overpack the non-DOT approved drums and bury them in the overpacks. Currently we are using 70 overpacks to ship our liquid wastes so after our liquid wastes are off site, we will overpack the solids and ship for burial.

I can assure you this Division is making every effort to remove our accumulated hazardous wastes as quickly and efficiently as possible.

Sincerely,

SHELLER-GLOBE CORPORATION

Dear Mr. Voelker:

As per our conversation of 12-7-83, due to means beyond our control, Sheller-Globe Corporation, Keokuk Division, may not meet our December 15th deadline for the removal of hazardous wastes.

As of this date, we have removed the majority of our hazardous wastes off site. I can assure you every effort is being made to expedite the removal of the remaining hazardous wastes and I will keep Mr. Whiting up-to-date on our progress.

Sincerely,

SHELLER-GLOBE CORPORATION  
KEOKUK DIVISION
